

QSWXK motor technical manual

Technical information

Drawing

A. Shaft length of motor: 138mm, fork size: 100mm

B. Cable length: L=150mm

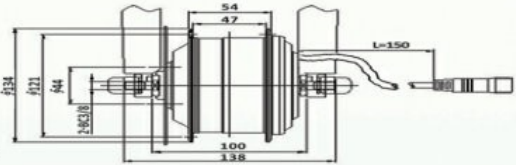

Surface treatment:

The surface of the motor is fast cutting, pure metal bright, no painting.

Connector: 3-pin water-proof socket

Rotating direction

By view the direction from the output terminal, its rotating direction is clockwise.

The output power is from 180W to 250W

Input Voltage:DC24V or DC36V

Net weight:2.8KG

Advantage of the motor

- Superior water-proof
- Much more economical for the higher performance
- The fork size is 100mm, it is same as the standard bike
- Brushless, without HALL, Long life (bearing's life), Free maintenance
- High efficiency, Low electric power consumption, Long distance for driving
- Small volume, Light weight, very low noise, Great power, Simple construction
- Excellent starting performance, No magnetic hysteresis damping energy consumption
